

## How to ensure App will not be cleaned up

In order to reduce standby power consumption, some applications will be cleaned up in the background during standby. Once an application is cleaned up in the background, it can cause delays in notifications or data interactions. How to ensure that the app will not be cleaned up by the background? Take Facebook app as an example. Make the following steps to ensure that the Facebook app will not be cleaned up by the background.

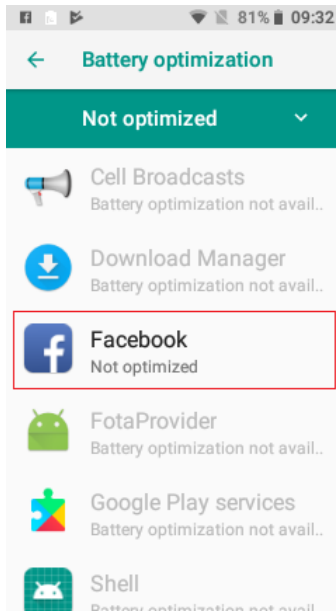

1. Through the main menu "Settings -> Smart Assistant -> Power save manager "

2. Through the main menu "Settings -> DuraSpeed "

3. Through the main menu "Settings -> Battery ->  -> Battery optimization "
